-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: “B1” and “B2” as referred to on page 6 of the Specification are not labeled in the Drawings.
2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3721

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over

MOORE ET AL (US 6588173).

MOORE ET AL discloses a method of performing a changeover in a packaging machine in which each component to be changed is color coded. Each component is changed by an operator and verified according to a list and the verification of the proper color and label for each component.

MOORE ET AL does not disclose identifying or verifying the components changed by means of a handheld device with a barcode reader.

However, Applicant is given Official Notice that the use of barcode readers to identify items in a manufacturing line or machine is well known in the art and it would have been obvious to one of ordinary skill in the art at the time the invention was made to use a handheld barcode reader to identify and verify the components changed over in the invention of MOORE ET AL in order to enable even untrained personnel to comply with the changeover procedures.

Examiner also notes that it has been held that broadly providing a mechanical or automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art. *In re Venner*, 120 USPQ 199.

5. The following prior art made of record and not relied upon is considered pertinent to Applicant's disclosure:

- PATIL ET AL discloses a method of manufacturing that uses barcodes and barcode readers to track and verify parts as they pass through the production line.
- MADDEN discloses a method of tracking automobiles on an assembly line using barcodes and barcode readers.
